

IONIC DETOXIFICATION

What is the Ionic Total Body Detox? It's easy and healthy. It is an external detoxification method, which removes toxins through your feet. The body detoxifies while you are comfortably seated with your feet placed in a container of warm water. This is a very efficient way to remove toxic accumulations regardless of where they are located in the body. The ion-cleanse process generates a stream of positive and negative ions (charged atoms), which attract and attach themselves to oppositely charged toxic particles and draws them out of the body through the skin. Each session takes about 30 minutes. The array goes into the water with the hands, feet or body, and the power supply delivers a small amount of direct current into the array, which causes the metals within it, in combination with water, and salt, to generate positively and negatively charged ions.

THE WORK THEORY OF ION CLEANSE

The ion-cleanse process is an amazing cleansing method for detoxifying your entire body by bathing your feet in warm water while using positive and negative ions from an ion generator. The process is also known as electrolysis. The array element is the actual ion generator device that sits down into the water and creates the ion charge and flow within the solution. It attaches to the power supply, which controls the array element ion flow and charge.

THE ADVANTAGES OF THE ION CLEANSE

The human body is like a giant magnet that attracts and holds on to toxins. Heavy metals, partially oxidized fats, dissimilated proteins, cholesterol deposits, uric acid, plaque, lactic acid and the vast array of chemicals that pervade our water, air and food attach themselves ionized form joints, organs, arteries, nerves and tissues. These toxins disrupt normal body functions creating an environment for disease, allergies, and immune system problems.

QUICK, EASY, AFFORDABLE

The more toxins we maintain, the faster we age and the faster our bodies break down. The immediate benefits are an increase in energy and overall well-being, a healthier disposition, a better state of mind, weight loss, and increased metabolism, improved digestion which will help in restoring balance to the body and its organs and lessening of the body's symptoms of discomfort. The aging process is slowed and the skin is able to rejuvenate itself correctly.
